

1. Profil du produit

Cet appareil est un nouvel appareil de diagnostic de panne de véhicule basé sur Android développé pour les applications Internet. Il se caractérise par une large gamme de véhicules, une fonction puissante et un résultat précis. Grâce au connecteur OBD de diagnostic du véhicule et aux variantes de terminaux intelligents mobiles, il réalise un diagnostic des problèmes du véhicule pour le modèle de voiture complet et le véhicule à système complet.

Pendant ce temps, profitant de l'Internet mobile, cet appareil intègre plus d'applications et de services, tels que la base de données de maintenance, l'assistant à distance, la mise à niveau à une clé, etc.

2. Caractéristiques

- **Fonction diagnostique**

Diagnostiquer le système de contrôle électronique des modèles de véhicules courants couvrant l'Asie, les Amériques et l'Europe. Les fonctions de diagnostic incluent : lire le DTC, effacer le DTC, lire le flux de données, les fonctions spéciales, etc.

Fonctions de classification : y compris Moto Diag, Service, etc.

Spécialement conçu pour la plate-forme Android, l'interface est simple et belle, et l'opération est simple.

- **Centre personnel**

Informations utilisateur et informations de configuration de l'appareil.

- **Gestion de données**

Y compris la gestion de fichiers, la lecture de données, le modèle de désinstallation, l'atelier, la visionneuse d'images.

- **Soutien**

Équipé d'une base de données puissante. Un grand nombre de vidéos aident les utilisateurs à utiliser facilement l'appareil.

- **Réglages**

Définissez les informations VCI, la langue, l'unité, le test réseau, vider le cache, les paramètres, l'étalonnage CC et à propos, etc.

- **Mise à niveau**

Le mode WIFI intégré peut réaliser le téléchargement d'applications et la fonction de diagnostic par une mise à niveau à une touche.

3. Connaissance de cet appareil

- **L'ensemble complet**

Cet appareil est composé d'une tablette, d'un câble de test principal et de certains types de câbles.

- **L'ordinateur tablette**

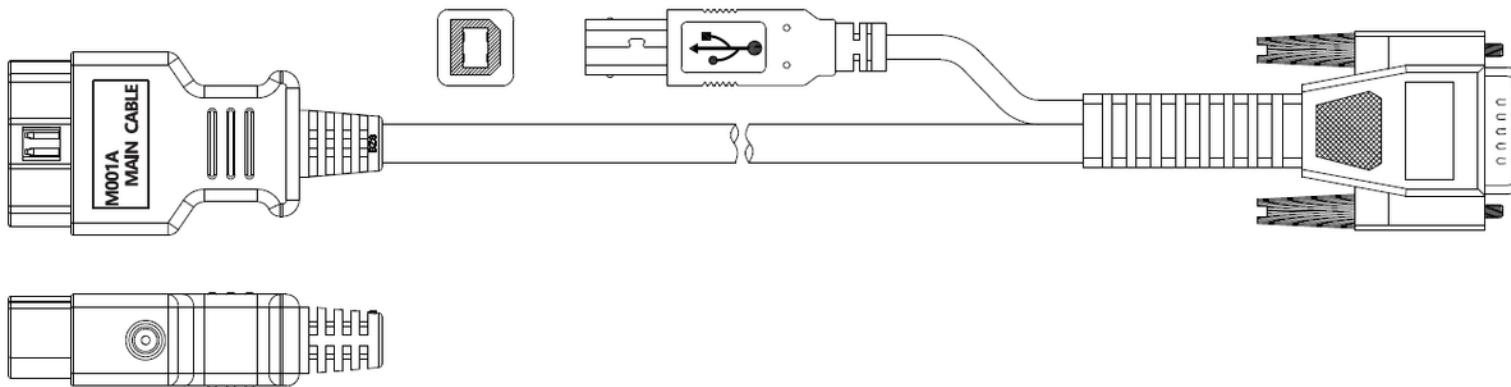

4. Paramètres techniques

- Système d'exploitation : Android 5.1.1
- Processeur : RK3128 Quad-Core, ARM Cortex A7@1.2Ghz
- Battery: 2600mAh, rechargeable polymer lithium battery
- Extension memory card: 32G Micro SD (TF) card supported
- LCD: 5.0 inch
- LCD resolution: 800*480
- Touch screen: Capacitive touch screen
- Wi-Fi: supported
- Working temperature: -10°C ~ 55°C (14°F ~ 131°F)
- Storage temperature: -20°C ~ 70°C (-4°F ~ 158°F)
- Weight: about 0.47 Kg
- Dimension: 220mm*116mm*29mm

5. Accessories (Standard Configuration)

- **Main test cable**

Pack different main cable according to different configurations

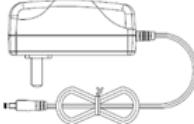

- **Other Connectors**

Other connectors are used to connect the diagnosis socket of non OBD II vehicles. To choose the connector according to the vehicle brand and models.

Note: Different configurations may choose different accessories.

- **Others accessories**

DC Power Adapter (Output DC 12V/2A), To power up the tablet via connecting with outside power Supply.

6. Charge This Device

1. Connect the included USB cable with charger.
2. Plug the charger into AC outlet.
3. When it connects to charger, battery logo indicates , it indicates that the battery is in charging.
4. When battery logo changes into , it indicates that the battery is fully charged.
5. Unplug USB cable on the charger from this device. 

7. Using Battery

- If the battery keeps unused for a long time or battery is completely discharged, it is normal if it cannot be turned on while being charged. Please charge it for a period and then turn it on.
- Using data service will cause more power consumption and shorten the stand by time.
- The charging time of battery varies with temperature condition and battery consumption status.
- While this device has low battery, a beep will sound. If it is very low, this device will be switched off automatically.

Note: Do one of the followings to save power:

- When this device keeps unattended, press POWER key to turn off the LCD.
- Shorten the standby time: Enter the main menu, choose "Settings" > "DEVICE" > "Display" > "Sleep" to select a shorter standby time.
- Decrease the brightness of LCD display: Enter main menu, choose "Settings" > "DEVICE" > "Display" > "Brightness", and then drag the slider to adjust it.
- Change "Live wallpaper" into "Gallery".
- Set Bluetooth off: Enter the main menu, choose "Settings" > "Bluetooth", and then toggle the switch to OFF.
- Press VOLUME key to decrease the volume.

8. Power On/power off This Device

- Power on
Press and hold Power button for three seconds to turn on this device.
- Power off
Press and hold Power button for three seconds to turn off this device.

9. About Desktop

ICON	FUNCTION	DESCRIPTION
	Back button	Go back to previous interface or exit program.
	Print screen	Make a quick screenshot and save it to gallery.
	Home button	Return to the desktop.
	Touch screen menu button	Press this key to quickly switch between open windows.
	DP button	Enter diagnose and program interface.

10. Customize Your Desktop

- **Add items on the desktop**

On the main menu, hold and press the desired item, the system will automatically enter the desktop and place the icon into the circle. Hint: If many applications occupy the desktop, hold and press the desired one to move it to other extension desktop.

- **Move items on the desktop**

Hold and press the item to be moved. After a movable circle appears on the screen, drag it to the target location.

- **Delete items on the desktop**

Hold and press the desired item, "Delete" appears in the upper middle of the screen. Drag the item to "Delete". When the item and icon turn red and then release it.

- **Change your wallpaper**

Hold and press a blank area on the desktop, a pop-up wallpaper will be shown on the screen. Choose desired wallpaper. Click upper left corner "√" to set wallpaper.

- **Create a folder on the desktop**

Drag one icon to another icon, the system will create a folder. Input the folder name.

11. On Using Touch Screen

- Tap: Tap the corresponding item with your finger to confirm the selection or start the application.
- Long press: Long press the icon or input field to open the operation option menu of the current interface.
- Slide: Slide your finger horizontally or vertically on the screen.
- Drag: Long press the selected item with your finger, and then drag the item to any position on the screen.

12. Lock & Unlock

- **Lock the screen**

- When the device is ON, press POWER key to lock the screen.
- The system will lock the screen automatically if after this device remains idle for a long time.

- **Unlock the screen**

- Press POWER key to activate the screen and then drag the lock to "Unlock position."

13. Notification Bar

The notice bar is used to display some activities, messages to remind and inform users.

- **Turn on the notification panel**

- When a new notification icon appears on the status bar, slide the status bar downwards to open it.
- In the notification panel, click the desired notification item to open it.

- **Turn off the notification panel**

- When the notification panel is opened, click on the blank space of the screen and the notification panel will automatically retract.

14. Input Method

- **Set input method**

- Enter main menu and then select "Settings" -> "Personal" -> "Language&input" to Choose desired input method.
- The default input method supports a powerful thesaurus engine, multiple keyboard modes. Android keyboard and Google input method and make input easier. To start text input modes, please click any text input entry.

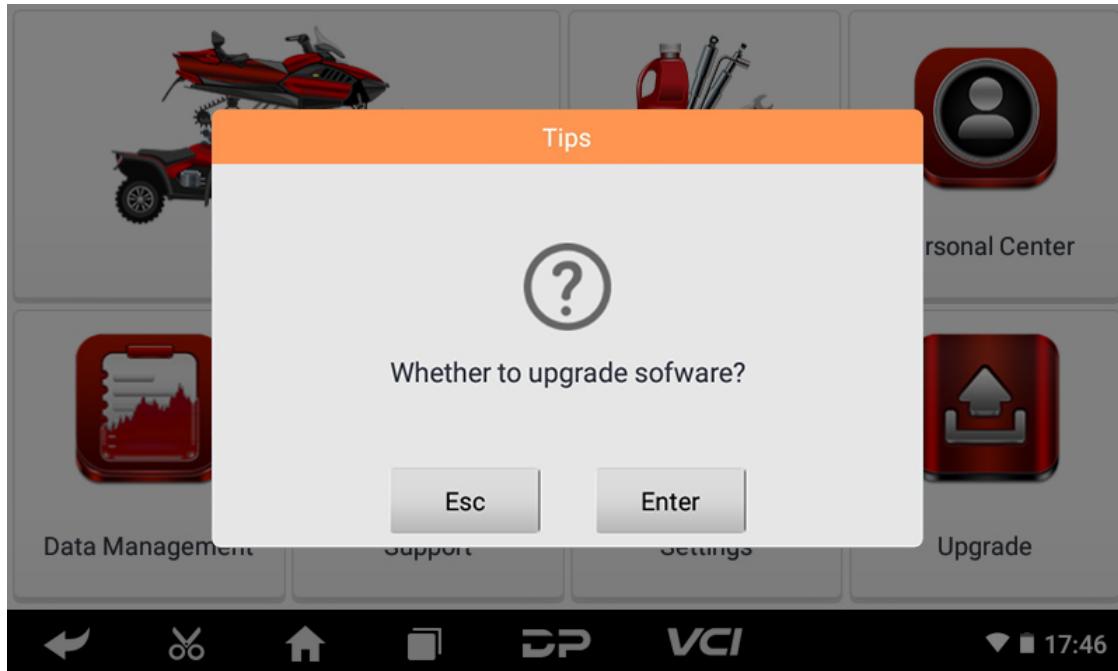

15. How to Set as Airplane Mode

- According to the regulations of some countries or regions, PC device must be turned off before boarding on the airplane.
- The way to disable functions of this device is to set it as airplane mode. In this mode, all wireless radio waves will be off, including mobile network, Bluetooth and WLAN.
- Do one of the followings to enable or disable airplane mode:
- Press POWER key and choose "Airplane mode" from the pop-up option menu.
- Access the main menu, and choose "Settings" > "WLAN" > "More" > "Airplane mode".

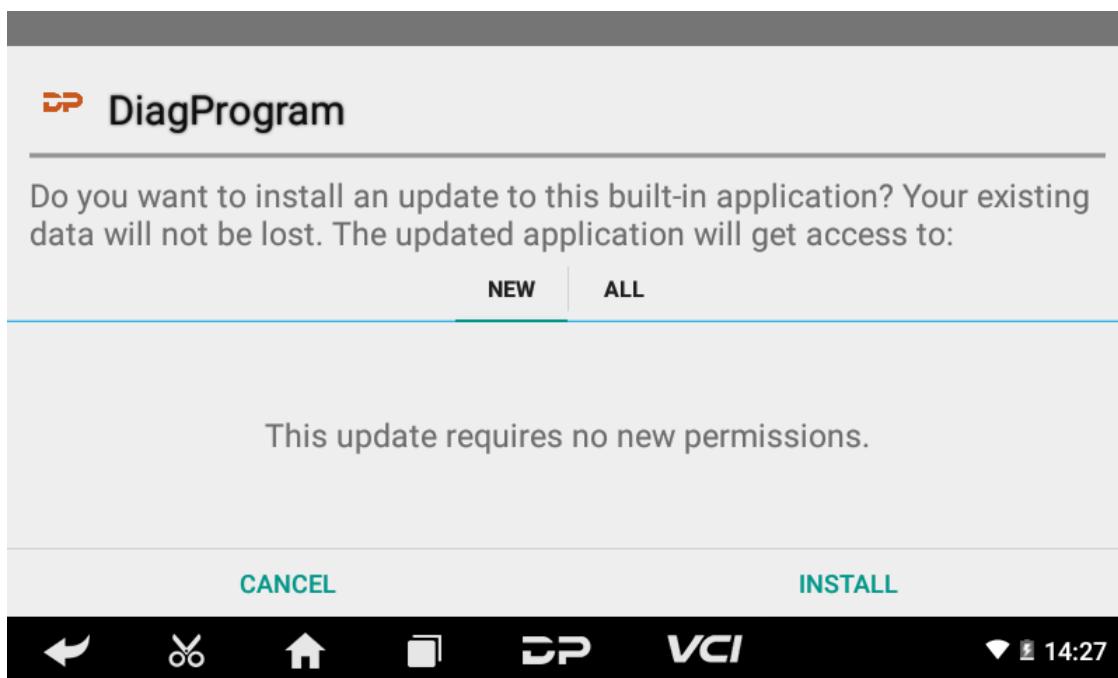

Remarques : Assurez-vous que la connexion Internet est normale lors de la mise à jour. De plus, à cause de nombreux logiciels, cela peut prendre plusieurs minutes, veuillez patienter.

1. Mise à niveau du système de détection

Le système APK détecte automatiquement la version. S'il y a une mise à jour de version, un point rouge se trouve dans le coin supérieur droit du bouton de mise à niveau. Cliquez sur le bouton de mise à niveau pour demander « Voulez-vous mettre à niveau le logiciel ? ».

Si vous choisissez "ESC" pour ne pas mettre à niveau, il reviendra directement à l'interface principale ; si vous choisissez "Entrer", une invite de mise à niveau et d'installation de l'APK apparaîtra.

Cliquez sur "INSTALLER" pour mettre à niveau et installer l'APK, après la mise à niveau et la mise à jour, une clause de non-responsabilité apparaîtra et cliquez sur "Accepter" pour accéder à l'interface de la fonction de diagnostic.

2. Diagnostic Function Upgrade

If more than one downloaded model diagnosis software needs to be updated, download and upgrade software by "Bulk Update". The software provided in the following operations is only for reference and guidance.

<input type="checkbox"/>	Software name	Local latest version	Downloadable	[0/5] Loading... 
<input type="checkbox"/>	DIAG-MOTORCYCLE-HONDA	–	30.07 	3.85 MB
<input type="checkbox"/>	DIAG-MOTORCYCLE-KAWASAKI	–	30.21 	6.24 MB
<input type="checkbox"/>	DIAG-MOTORCYCLE-OBD-II	–	30.19 	5.50 MB
<input type="checkbox"/>	DIAG-MOTORCYCLE-SUZUKI	–	30.08 	6.74 MB
<input type="checkbox"/>	DIAG-MOTORCYCLE-YAMAHA	–	30.22	1.90 MB

Click the check box in front of the software name, and then click "Bulk Update" to start downloading and updating.

Upgrade 

<input checked="" type="checkbox"/>	Software name	Local latest version	Downloadable	[0/5] Loading... 
<input checked="" type="checkbox"/>	DIAG-MOTORCYCLE-HONDA	—	30.20 	Loading... (1/4) 3.34 MB 891.52 KB/s
<input checked="" type="checkbox"/>	DIAG-MOTORCYCLE-KAWASAKI	—	30.22 	Loading... (0/4) 6.48 MB 2.30 MB/s
<input checked="" type="checkbox"/>	DIAG-MOTORCYCLE-OBD-II	—	30.22 	Loading... (2/4) 3.20 MB 266.29 KB/s
<input checked="" type="checkbox"/>	DIAG-MOTORCYCLE-SUZUKI	—	30.18 	Queuing
<input checked="" type="checkbox"/>	DIAG-MOTORCYCLE-YAMAHA	—	30.52 	Queuing

      * 08:59

If a software needs to be canceled, just tap the corresponding Check Box. You can search for the updated model required in the search box (Fuzzy Search function). As the following photo shown:

Upgrade  

<input type="checkbox"/>	Software name	Local latest version	Downloadable	[0/1] Bulk Update 
<input type="checkbox"/>	DIAG-MOTORCYCLE-OBD-II	—	30.22	1.90 MB

      * 14:24

After the upgrade is completed, you can enter the diagnostic programming to view the upgrade version description and the version number, and you can perform related diagnostic operations and functions.

1. Connectez le connecteur VCI

- **Procédure pour connecter le connecteur VCI :**

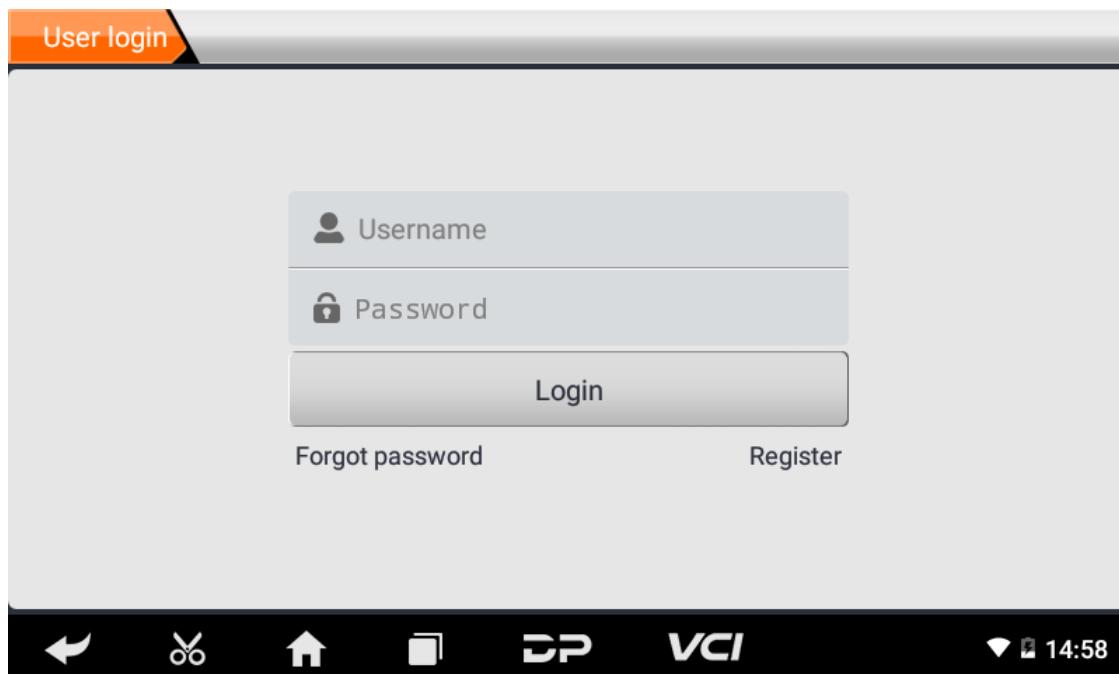

1. Localisez la prise de diagnostic des motos. Les connecteurs de la prise de diagnostic des différents modèles sont incohérents. Vous devez utiliser l'adaptateur de modèle correspondant. Vous pouvez vérifier l'emplacement approximatif de l'adaptateur de modèle dans le bitmap de diagnostic des données logicielles.
2. Branchez le connecteur de diagnostic de cet appareil dans la prise de diagnostic.

2. Organigramme de diagnostic

Pour les nouveaux utilisateurs, veuillez suivre l'étape 3 pour faire fonctionner et commencer à utiliser le produit. Connectez le connecteur de diagnostic -> enregistrement de l'utilisateur -> connexion de l'utilisateur -> télécharger ou mettre à niveau le logiciel -> sélectionner la fonction ou le type de véhicule -> procéder au diagnostic

3. Centre personnel

Utilisé pour configurer et gérer les détails du compte, et vous pouvez afficher les informations du revendeur :

- **Enregistrement de l'utilisateur**

Entrez dans l'interface Personal Center, affichez l'interface de connexion, cliquez sur le bouton "S'inscrire" dans le coin inférieur droit pour accéder à l'interface d'enregistrement de l'utilisateur. Comme indiqué :

4. Présentation de l'interface principale du logiciel de diagnostic

L'interface principale est divisée en les fonctions suivantes :

FONCTION	LA DESCRIPTION
Moto Diag	Entrez dans la fonction de programmation de diagnostic d e moto.
Service	Enter the service function.
Personal Center	New user registration, login; User details management, dealer information inquiry.
Data Management	Including File Management, Data Playback, Uninstall Modle I, Workshop, Picture Viewer.
Support	Including Video, Manual, FAQ, Log Upload and TeamViewe r.

Settings	It includes VCI Info, Language, Unit, Network Test, Clear cache, Settings, DC Calibrate, About.
Upgrade	To download diagnostic software or upgrade diagnostic software to the latest version.

5. Start Diagnosing

Click "Moto Diag" in the main interface to enter the function selection and model selection interface, and enter the "All" menu path by default. Different product configurations are equipped with different software, please refer to the actual software. The software provided in the following operations is only for reference and guidance.

Select the Favorites menu, click "+" to enter the interface of selecting vehicle series of each area, check the box in the upper right corner of the vehicle logo, and then click "Add" in the upper right corner of the interface to add to Favorites.

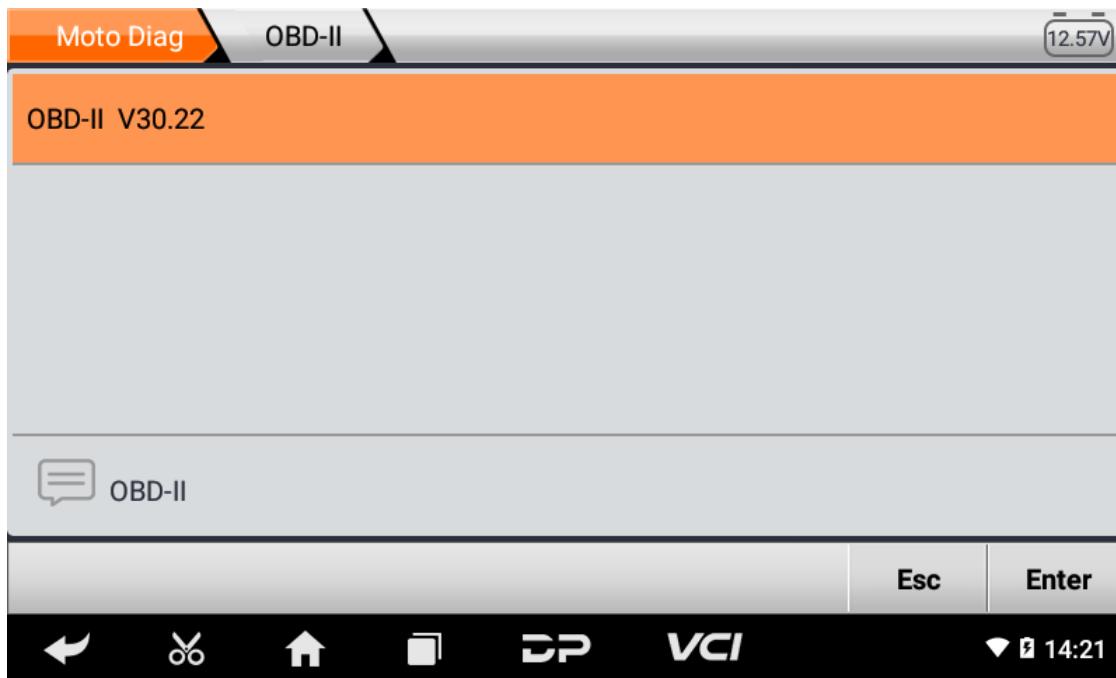

Delete the favorite vehicle series from Favorites, click "-" to enter the interface of the favorite vehicle series. Check the box in the upper right corner of the vehicle logo, and then click "Delete" in the upper right corner of the interface to delete from Favorites.

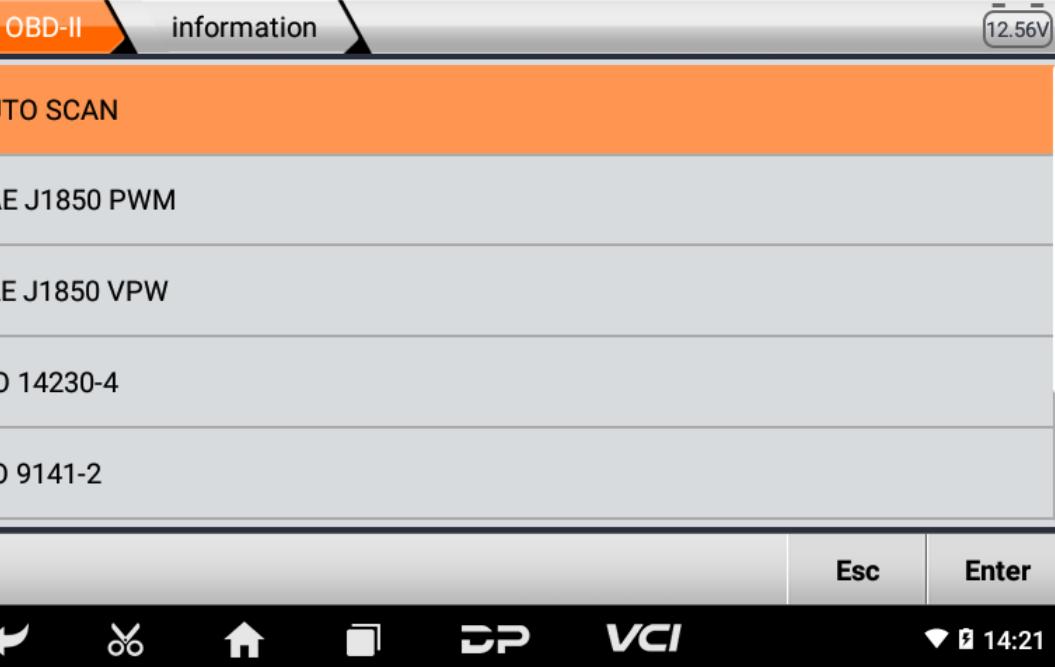

You can see all the downloaded software of the machine configuration. OBD II software defaults to each area, and in the first position:

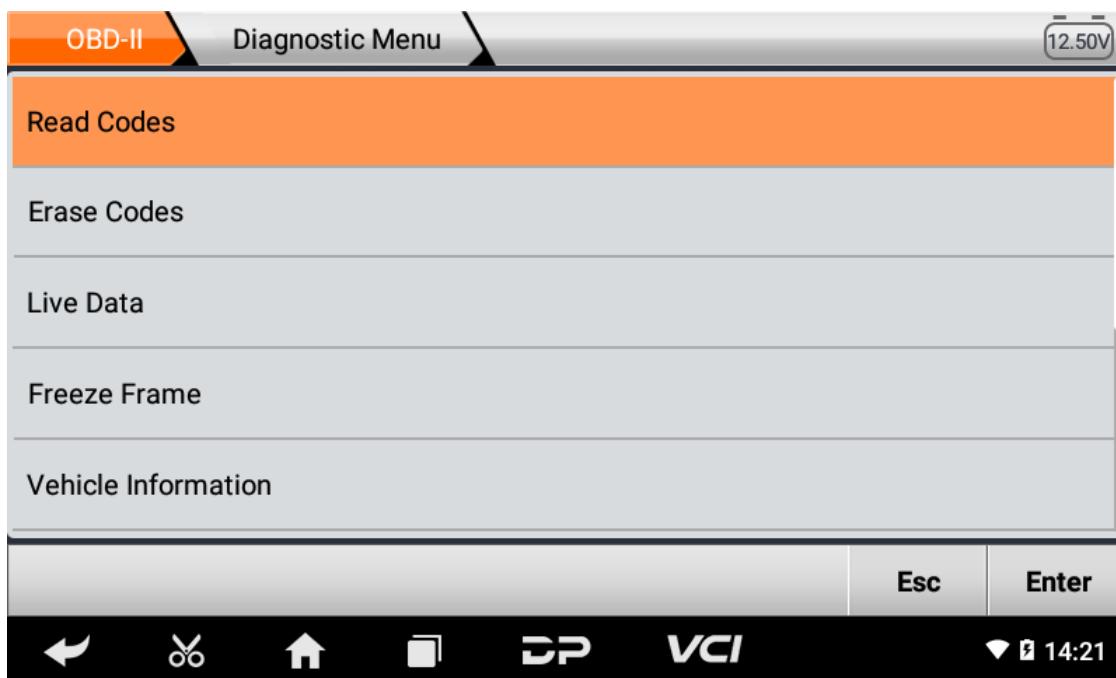

The following takes OBD II as an example to introduce how to start the diagnosis. Click the "OBD-II Engine" icon under the menu of other special functions and select the software version, as shown below:

To enter diagnostic function menu, As shown in the figure below:

Select AUTO SCAN, as shown below:

1. Read vehicle information

Tap "Vehicle information" . As shown below:

The screenshot shows a mobile application interface for an OBD-II scanner. At the top, there are two tabs: "OBD-II" (highlighted in orange) and "AUTO SCAN". In the top right corner, the battery voltage is displayed as "12.50V". Below the tabs is a table with two rows of vehicle information:

Name	Value
ECU Mode	\$10
Calibration Identifications	33D907559H 0050

At the bottom of the screen, there is a black navigation bar containing several icons: a left arrow, a gear, a home icon, a square, a "DP" icon, and a "VCI" icon. To the right of the "VCI" icon is a signal strength indicator and the time "14:22".

2. Read Stored Codes

Tap "Stored Codes" . As shown in the figure below:

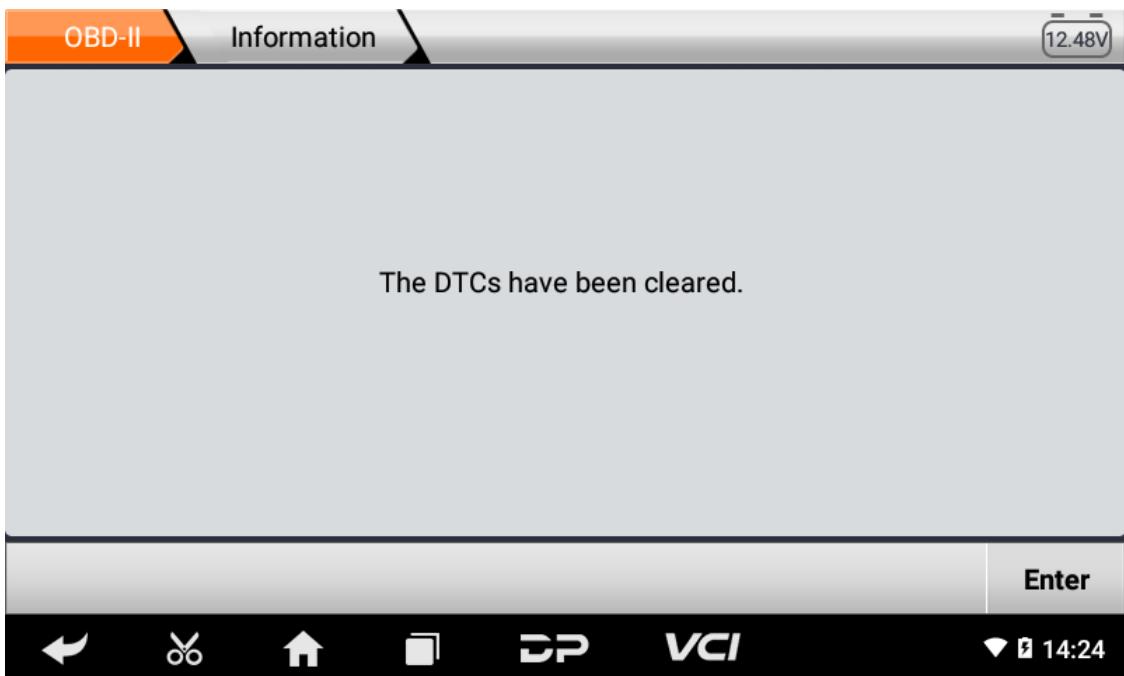

The screenshot shows the same mobile application interface as the previous one, but with a different selection. The "Stored Codes" option is highlighted with an orange background and a checkmark icon in the top right corner. The other options, "Pending Codes" and "DP", are in grey. The navigation bar at the bottom remains the same.

The screenshot shows a mobile application interface for OBD-II diagnostics. At the top, there are tabs for "OBD-II" (highlighted in orange) and "AUTO SCAN". In the top right corner, the battery voltage is displayed as 11.94V. The main area is a table with four columns: "DTC ID", "DTC Description", "State", and "Other". The table contains three rows of data:

DTC ID	DTC Description	State	Other
P2105	Throttle Actuator Control System - Forced Engine Shutdown		
P0122	Throttle/Pedal Position Sensor/Switch A Circuit Low		
P0223	Throttle/Pedal Position Sensor/Switch B Circuit High		

At the bottom of the screen, there is a navigation bar with icons for back, forward, home, and menu, followed by the text "DP" and "VCI". On the far right, the time is shown as 20:34.

3. Clear trouble codes

4. Read data stream

OBD-II	AUTO SCAN	12.48V
Number of DTCs	1	
Malfunction Indicator Lamp (MIL) Status	2	
Fuel System 1 Status	3	
Fuel System 2 Status	4	
Calculated Load Value	5	
Engine Coolant Temperature	6	
Short Term Fuel Trim - Bank 1	7	
	Clear	Esc
	Enter	
	VCI	14:24

OBD-II	AUTO SCAN	12.44V		
NO.	Data stream name	Value	Range	Unit
01	Number of DTCs	0		
02	Malfunction Indicator Lamp (MIL) Status	MIL OFF

1. Product Profile

This device is a new Android-based vehicle trouble diagnostic device developed for Internet applications. It is characterized by covering wide range of vehicles, featuring powerful function, and providing precise result. Through vehicle diagnostic OBD connector and variant mobile intelligent terminals, it achieves vehicle trouble diagnosis for full car model and full system vehicle.

Meanwhile, taking advantage of mobile Internet, this devic

- **FAQ**

Summarize some common problems encountered in the use of the product.

1. Startup Failure

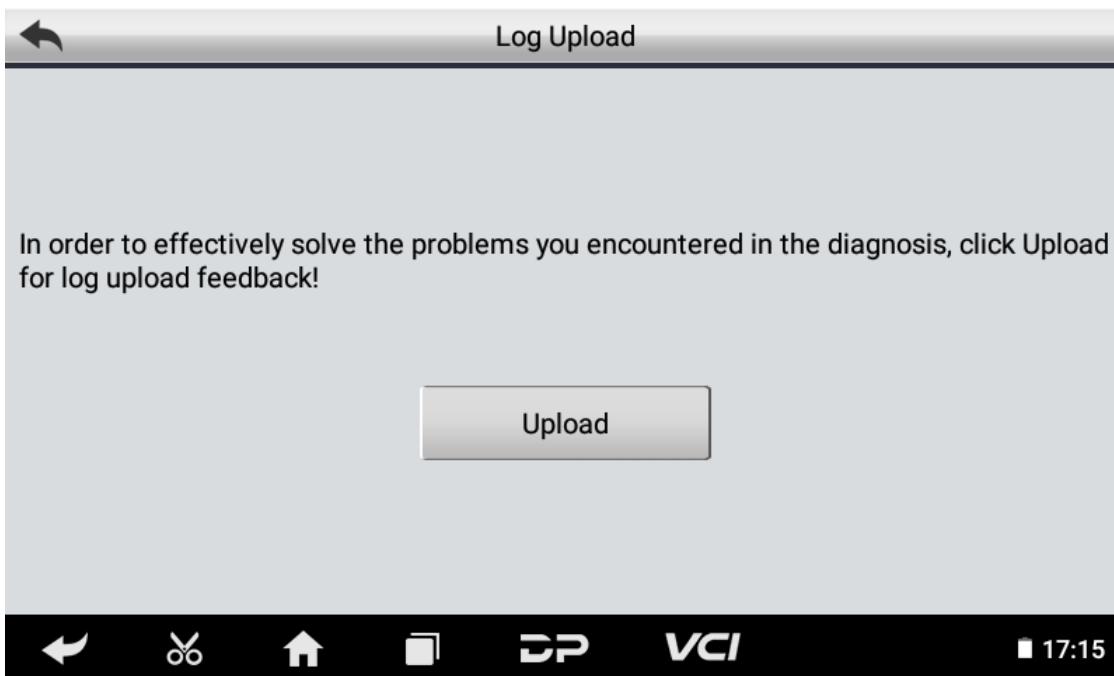

In case of startup failure, please connect the included DC power supply and the device will be able to power on while charging. If the battery is too low, it may take a few minutes. If the device is still unable to power on, please contact customer service department and return it to repair. If the temperature is lower than -20°C, it is unable to power on. Please power on in a proper environment. After the device is turned on, it will not be affected by the temperature and can work smoothly.

2. Touchscreen Interference

- **Log Upload**

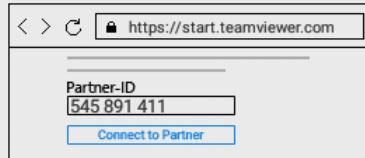

Manually upload the log files generated by the abnormality when diagnosing the vehicle.

- **TeamViewer**

This application can realize remote hosting operation via the Third Party's software: "Quick Support" or "AnyDesk". (If only the Quick Support is detected, you need to use AnyDesk and then you can return to the main menu interface to enter.)

1. Wi-Fi

This function enables you to enjoy surfing on the Internet and downloading data from the Internet via Wi-Fi.

- **Turn on Wi-Fi on**

- Enter main menu screen, choose "Settings" > "Wi-Fi".
- When the WLAN sign appears blue, it indicates Wi-Fi has been activated already.

Note: To prolong the battery life, please switch Wi-Fi off when unattended.

- **Connect to WLAN**

Turn on WLAN, if the device is within WLAN range, it will automatically detect and connect to the current WLAN, select the desired network and input password, then you can surf the internet by WLAN.

2. Browser

You can use any APP by way of browse website and network.

- **Open the browser**

Enter the main menu interface, click the browser to open the browser homepage, you can choose the desired homepage or input the website address to browse.

- Tap to input or edit the web link.

- Web page display area.
- Tap to open bookmarks, view history and saved web pages.

- **Browser webpage**

- Open the browser.
- Input the web address, and tap "Go" on the keyboard to visit the website.

Tips: Alternatively, you can also tap and select "Bookmarks/History" from the pull-down list to choose the web link you want to access.

- Once a webpage is open, slide the screen with your fingertip to view other hidden content.

- **Zoom in/Zoom out a page**

There are two ways to zoom in/ zoom out while browsing a webpage.

- To zoom in so that the text on a webpage appears in a column that fits your device's screen, double-tap with the tip of your finger.
- To zoom in manually, place two fingers on the screen and then spread them apart. To zoom out, either double-tap again or place two fingers apart on the screen and then pinch them together.

- **Save favorite webpage to bookmarks**

- While browsing a webpage, tap , and choose "Save to bookmarks".
- Edit a label for the bookmarks.
- Tap "OK" to confirm and save it.

- **Open multiple pages**

The browser allows you to open multiple web pages and you can toggle between these pages.

- While browsing a webpage, tap and open new window.
- Another web page will be displayed in the new window.

- **Customize internet settings**

While browsing a webpage, choose "Settings", you can view or change browser settings, privacy & security setting and advanced setting etc.

3. Gallery

This option is used to manage pictures and video files.

- **Open gallery**

Enter main menu screen, tap "Gallery" to access it. The system searches images and videos in this device and SD card automatically, and categorizes it into corresponding folders.

- **View a photo**

1. Enter main menu screen, tap "Gallery".
2. Tap the picture folder you want to view.
3. Tap the desired image to browse.
4. Swipe the screen rightwards or leftwards to view the next/previous picture.

4. Music

Music files are stored into 4 categories: Artists, Albums, Songs and Playlist. Tap the desired music to display music.

Tips: While playing, tap back button to switch to other applications and the player will be running in background. Open the status bar and choose the audio file to return to the player screen.

5. Calculator

You can use the calculator to perform addition, subtraction, multiplication and division operations, as well as function operations for sin, cos, tan and log.

6. Calendar

This function lets you view calendar or create to-do events. Enter main menu screen, tap "Calendar". Swipe up and down to switch to month; Tap a day, the followings can be done. Tap  to refresh, search, and hide control and setting.

7. Clock

- **Add an alarm**

1. Enter main menu, and tap "Alarm".
2. Tap  to add alarms.
3. Set the detailed information of the alarm.
4. Tap  to pack up the alarm to store the setting.

- **Delete an alarm**

1. Enter main menu, and tap "Alarm".
2. Tap the desired alarm.
3. Tap  to delete it.

Tips: After the alarm is deleted, you can choose to cancel delete alarm on the right side from the option menu.

- **Customize your alarm**

1. Enter main menu, and tap "Alarm".
2. Tap menu button, and then choose "Settings".
3. Alarm volume: Set the volume of alarms.
4. Set the duration of alarm.
5. Set the duration the alarm snooze next time.
6. Volume buttons: set what these buttons function when pressed during an alarm.
7. Set default ringtone: choose the alarm ringtone.

- **Timer setting**

1. Enter the main menu to tap  to choose timer;
2. Set countdown time;

3. Tap to add timer, and tap to delete alarm;
4. Tap to start the timer, and tap to stop counting down;

Notice: after the countdown ends, the device will ring alarm sound.

- **Stopwatch setting**

1. Enter the main menu to tap to choose second clock;
2. Tap to start stopwatch, and tap to stop second clock;
3. Tap to reset the stopwatch;
4. Tap on the right side to display the smaller unit counter of the stopwatch;

8. ES File Explorer

Open ES file viewer, and enter main menu. You can manage SD card, browse by category and browse all music, picture, video, document application, package, favorites, installation package, management recommended through catalogue.

9. Display

- **Brightness**

1. Enter main menu screen, tap "Settings" > "Display".
2. Tap "Brightness" to enter.
3. Drag the slider leftward to lower the screen brightness. Drag the slider rightward to increase the screen brightness.

- **Auto-rotate the screen**

1. Enter main menu screen, tap "Settings" > "Display".
2. When setting the rotation of device, keep the orientation of the rotated screen.

10. Set Screen Lock

You can set a screen lock pattern. When the screen is locked, it will not be unlocked until you draw the right pattern.

1. Enter main menu screen, tap "Settings" > "Security" > "Screen lock".
2. There are several options available for your selection. To define a pattern, follow the on-screen prompts to plot your pattern.
3. After drawing, tap "Confirm" to save your setting.

11. Application

- **View installed applications**

1. Enter main menu screen, tap "Settings" > "Apps" to open the downloaded application list.
2. The following operations can be done:
 - Tap the desired one to view the application information.
 - Tap and choose "Sort by size" from the pull-down menu, the applications will automatically appear in size order.
 - Tap and choose "Reset app preferences" from the pull-down menu, a confirmation dialog box will appear on the screen, tap "Reset apps" to proceed; tap "Cancel" to abort.
3. To uninstall an application, tap it to enter the application information screen.
4. Tap "Uninstall" and then follow the on-screen instructions to finish it.

- **View the running applications**

1. Enter the main menu screen, tap "Settings" > "Apps". Scroll the screen from right to left to RUNNING tab to open the currently running application list.
2. The following operations can be done:
 - View the currently running applications;
 - Tap any one to stop it.

12. Language & Input

- **Language setting:**

1. Enter the main menu screen, tap "Settings" > "Language & input" > "Language".

2. Tap "Language" and choose the desired language in this device.

- **Input method setting:**

1. The device provides several kinds of input methods. Tap setting before the desired input method.

13. Set Date & Time

This device is preset to use the network-provided date, time zone and time. Note: If Automatic date & time is set as Use network-provided time, date, time and time zone will not be defined.

1. Enter the main menu screen, and tap "Settings" > "Date & time".
2. Tap "Set date", and scroll the screen upwards or downwards until the desired numbers appears in the highlight area.
3. Tap "Select time zone", and choose the desired one from the time zone list. Scroll the screen upwards and downwards to view more.
4. Tap "Set time" and scroll the screen upwards or downwards to adjust the hour and minute. After setting, tap "Done" to confirm.
5. Select or deselect "Use 24-hour format" to switch between 12-hour format and 24-hour format.
6. Tap "Choose date format" to choose the desired date of this device format from the list.

14. Restore to Factory Settings

This option enables you to restore this device to the default factory settings. Once it is reset, all data (including downloaded applications) will be deleted. Note: Before resetting to factory data reset, please back up all important data saved in your device.

1. Enter the main menu screen, tap "Settings" > "Backup & reset" > "Factory data reset".
2. Follow the instructions on the screen to proceed.

15. Storage

Enter the main menu, and tap "Settings" > "Storage", check the store situation of the device. Store the download content in the default browser to the download content list.

16. App Installation/Uninstallation

- Install: Put the application package under the root directory of SD card, enter "File Manager" and then tap the desired package to start installing.
- Uninstall: Tap "Settings" > "Apps", and choose the desired one to uninstall.

3. Précautions de sécurité

Avant d'utiliser cet appareil, veuillez lire attentivement les consignes de sécurité suivantes. Pour plus d'informations, reportez-vous à l'annexe "Avertissements et précautions de sécurité".

- Ne heurtez, ne lancez ou ne frappez jamais cet appareil et évitez de le faire tomber, de l'extruder et de le mélanger.
- N'utilisez pas cet appareil dans des environnements exceptionnellement froids ou chauds, poussiéreux, humides ou secs.
- Dans les endroits où cet appareil est interdit ou où l'utilisation de cet appareil peut provoquer des interférences ou générer un risque potentiel, veuillez l'éteindre.
- N'utilisez pas cet appareil en conduisant.
- Sur les sites médicaux, veuillez respecter les réglementations ou règles applicables, dans les zones proches des équipements médicaux, veuillez éteindre ce produit.
- Éteignez cet appareil avant d'embarquer dans un avion.
- Ne placez jamais cet appareil dans un appareil à fort champ électromagnétique.
- Ne démontez pas cet appareil par vous-même. S'il y a une demande, veuillez contacter le revendeur.
- Ne placez pas le produit et les accessoires dans des appareils avec de forts champs électromagnétiques.
- Gardez cet appareil loin des appareils magnétiques car ses radiations peuvent effacer les données stockées sur les appareils.
- N'utilisez pas cet appareil à haute température et dans d'autres environnements contenant des gaz inflammables, tels qu'une station-service.
- Gardez cet appareil hors de portée des enfants et ne laissez pas les enfants l'utiliser sans surveillance.

- Veuillez utiliser la batterie et le chargeur inclus. Sinon, une explosion peut se produire.
- Conformez-vous aux lois et réglementations et respectez la vie privée et les droits légaux des personnes lors de l'utilisation de cet appareil.

4. Précautions d'utilisation de cet appareil

Le contacteur d'allumage doit être sur OFF lors du branchement ou du débranchement du connecteur de diagnostic.

5. Précautions pour le fonctionnement de l'ECU

- Do not disconnect the inner consumer when the ignition switch is on. High voltage transients may be encountered when disconnected, which may damage the sensors and the ECU.
- Keep the computer away from magnetic objects.
- Do cut off the power supply of ECU system before performing any welding operations on the vehicle.
- Pay more attention to the ECU and the sensors when performing any operation near them.
- Ground yourself when you disassemble PROM, otherwise, ECU and sensors will be damaged by static electricity.
- Do connect ECU harness connector firmly, otherwise, electronic elements, such as IC inside ECU, will be damaged.

6. Safety Warnings and Precautions

Before using or operating the device, please read and observe the following precautions to avoid dangerous or illegal conditions and to ensure the best performance of this device.

7. Medical Equipment

- In the express provision for healthcare facilities that prohibits the use of wireless equipment, please comply with the provisions of the premises to shut down this device.
- Radio waves generated by this device may affect the normal operation of implantable medical devices or personal medical devices such as pacemakers, implantation of cochlea, hearing aids, etc. If you are using these medical devices, consult your manufacturer for restrictions on the use of this device.

8. Flammable and Explosive Area

- Do not use this device at the gas station (repair station) or near flammable materials or chemicals, and follow all graphic or text instructions. This device may cause an explosion or fire in or around the fuel or chemical storage and transport area or in an explosive area.
- Do not store or transport the equipment and its accessories in flame or flammable liquids, gases or explosive materials in the same box.

9. Traffic Safety

- Do not hold this device while driving and comply with the regulations in your area or country.
- Do not place the device above the vehicle's airbag or in the area that can be reached after the airbag is deployed, otherwise when the airbag inflates, the device will be pushed by strong external force, causing serious injury to the occupants.
- The wireless device may interfere with the aircraft's flight system, please comply with the relevant provisions of the airline, When the use of wireless devices is prohibited, please turn off this device.

10. Operating Environment

- Do not charge or use this device in a dusty, humid, dirty, or near magnetic field to avoid malfunction of the internal circuit of the device.
- Do not use this device during thunderstorms to avoid lightning strike or other damage.
- Turn off this device where it is expressly prohibited to use the wireless device.

- When this device is powered by a power adapter, the choice of the product altitude is determined by the matching adapter. For the tropical ambient temperature conditions, keep the ambient temperature between 0°C and 40°C. When this device is powered by batteries, keep the ambient temperature between -10°C and 40°C . Do not use the above temperature range, when the ambient temperature is too high or too low, otherwise, it may cause a malfunction.

11. Child Health

- This device and its accessories may contain small parts, please keep them out of the reach of children.
- Children may unintentionally damage this device and its accessories, or swallow small parts to cause suffocation or other hazards.

12. Environmental Protection

Please comply with local laws and regulations regarding device, batteries and their accessories, and support recycling operations. Do not dispose of device, batteries and their accessories as ordinary household waste.

13. Original Accessories

Use only original accessories provided by the device manufacturer. If you use any non-original accessories, it may affect the performance of this device, violate the warranty terms of this device or the relevant national and regional regulations on communication terminal products, and even lead to personal harm.

14. Use Batteries and Chargers

- When charging is complete, disconnect the device from the power outlet device.
- Do not connect metal conductors to the battery, or touch the end of the battery to avoid short circuits and physical damage caused by burnout due to overheating
- Do not place the battery or device around the heating equipment, such as a microwave oven, oven or radiator.
Batteries may explode when overheated.
- Do not disassemble or modify the battery to prevent the battery from leaking, overheating, igniting or bursting.
- If the battery leaks, do not expose the skin or eyes to the leaked liquid; if it gets on the skin or eyes, rinse immediately with water and go to the hospital for medical treatment.
- If the charger's cable is damaged, do not use it to avoid electric shock or fire.
- Do not throw the battery into the fire, otherwise it will cause the battery to fire and burst.

15. Repair and Maintenance

- Keep this device and its accessories dry. Do not use a microwave oven or other external heating equipment to dry it.
- Do not subject this device and its accessories to strong shock or vibration to avoid damage to the equipment and its accessories or to cause the battery to explode.
- Do not expose the unit or its accessories to excessively high or low temperatures. Doing so may result in malfunction, fire or explosion of the device, battery and charger. When the temperature is below 0°C, the battery performance will be limited.
- Do not use potent chemicals, cleaning agents or strong detergent to clean the device or accessories. Before cleaning and maintenance, please turn off and disconnect the charger.
- Do not disassemble the device and its accessories, otherwise the device and accessories will not be covered by our warranty.
- If the device collides with a hard object or the device is subjected to strong external impact, which causes the screen to break, do not touch or attempt to remove the broken part, stop using it immediately and contact the designated service point in time.

16. Warranty

The warranty is only applicable to users and distributors who purchase the company products through normal procedures. **Within one year from the date of delivery**, OBDSPACE warrants its electronic products against defects in materials or wor

kmanship. Damage to the device or components caused by abuse, unauthorized modification, use for purposes not designed for this product, or operation not in accordance with the instructions in the manual is not covered by this warranty.

17. Order Notification

Replaceable parts and optional accessories can be ordered directly from the company authorized supplier, please specify the following when ordering:

- Order quantity
- Serial number
- Part name

18. Customer Service Center

1. If you encounter any problem during the operation, please contact authorized supplier.
2. When the device needs repair, please send it to OBDSPACE Technology Co., Ltd. together with the purchase invoice and problem description. If the device is covered under the warranty, company will provide free maintenance; if the device is not under the warranty, company will charge maintenance and return freight.
3. OBDSPACE Technology Co., Ltd. After-Sales Service Information:
 - After-Sales Address: D03, Block A, No 973 Minzhi Ave, Longhua District, Shenzhen Guangdong, China
 - After-Sales Email: support@anceltech.com
 - Company Website: www.anceltech.com

19. Declaration

OBDSPACE reserves the right to change the product design and specifications without notice. Physical appearance and color may be a little different from the one shown in the instruction, please refer to the device. We have made every effort to make all descriptions in the manual accurate, but some inaccuracies are still inevitable. If in doubt, please contact the dealer or after-sales service center. The company does not bear any consequences due to misunderstanding.

1. Échec du démarrage

En cas d'échec de démarrage, veuillez connecter l'alimentation CC incluse et l'appareil pourra s'allumer pendant la charge. Si la batterie est trop faible, cela peut prendre quelques minutes. Si l'appareil ne parvient toujours pas à s'allumer, veuillez contacter le service client et le renvoyer pour réparation. Si la température est inférieure à - 20°C, il ne peut pas s'allumer. Veuillez allumer dans un environnement approprié. Une fois l'appareil allumé, il ne sera pas affecté par la température et pourra fonctionner sans problème.

2. Interférence de l'écran tactile

En cas d'écran tactile anormal, veuillez débrancher l'alimentation ou redémarrer, ou supprimer l'électricité statique. Si l'écran tactile est toujours anormal, veuillez contacter le service client et le renvoyer pour réparation.

3. Mise à niveau à une clé lente ou échouée

Vérifiez si la connexion Wi-Fi est normale et si le signal est bon. S'il ne peut pas être résolu, veuillez vérifier si la période de mise à niveau a expiré. Si tel est le cas, veuillez contacter le service client pour résoudre le problème.

4. Accident

En cas de plantage, veuillez appuyer longuement sur le bouton d'alimentation pendant plus de cinq secondes pour éteindre puis redémarrer.

5. Échec du test

Solution : exclure les problèmes de logiciel ---- mettre à jour le dernier logiciel ---- impossible à résoudre ---- offrir des commentaires ---- Exclure les problèmes de véhicule ---- véhicule sans aucun problème ---- (si autorisé) exclure les problèmes de fil principal ---- remplacer le même type de fil principal ---- confirmer le problème de l'appareil et le renvoyer pour réparation (avec le fil principal).

6. Impossible de charger

Vérifiez si le chargeur a une sortie de tension de 12 V. En cas d'absence de tension ou de tension anormale, veuillez remplacer le chargeur ; Si cela ne fonctionne toujours pas après le remplacement, veuillez contacter le service client pour réparer (avec le chargeur)

7. Mise à niveau du logiciel

Solution : interface DP----Enregistrement du centre personnel---Compte de connexion----Entrez dans l'application de mise à niveau----Cochez le logiciel à mettre à niveau----Cochez la mise à niveau par lots instruction-instruction de diagnostic et mise à niveau).

8. Suppression de logiciel

Solution 1 : DP----Gestion des données----Désinstaller les modèles de véhicules----Cochez le modèle de véhicule à désinstaller---Cliquez sur la marque de suppression dans le coin supérieur droit (Détails : Voir désinstaller les modèles de véhicules dans la sixième partie de l'instruction du produit/de l'instruction de diagnostic).

Solution 2 : Entrez dans l'interface DP, cliquez sur le logo du véhicule, entrez dans la page de version du logiciel, appuyez longuement jusqu'à ce qu'une invite apparaisse, et enfin sélectionnez supprimer.

9. Commutateur de langue du système

Entrez dans l'interface multifonction à partir de l'icône multifonction sur le bureau, sélectionnez "Paramètres" --- "Langue et saisie" --- "Langue" puis sélectionnez la langue souhaitée.
